ANTIRRHINUM

Maximum—Giant Flowered

This wonderful new group of snapdragons far surpasses anything yet introduced. In habit these are slightly taller than the Majus group. The flowers are magnificent size, the individual flowers being 2 to 2½ inches wide on strong, sturdy stems, each blossom set closely on the stalk.

GIANT PANSIES

VAUGHAN'S INTERNATIONAL MIXTURE

Is composed of all the colors of the Giant sorts as well as special strains of Bugnot, Masterpiece, Triumph of the Giants, and other special mixtures of the most noted Pansy growers. We feel sure that a better, more complete mixture is not to be had anywhere or at any price and confidently recommend it to our customers whose trade demands a superior article and who take pride in supplying something better than can ordinarily be had. Trade pkt., 50c; 1/8 oz., \$1.25; 1/2 oz., \$4.00; oz., \$8.00; lb., \$100.00.

VAUGHAN'S GIANT MIXTURE

Embraces all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International Mixture. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau and the splendid Cassier strain. Trade pkt., 50c; 1/8 oz., 75c; oz., \$5.00; 1/4 lb., \$18.00.

NEW EARLY FLOWERING GIANT PANSIES (Hiemalis)

This new strain produces its giant flowers about four weeks earlier than other known types. In March, when the old type pansies hardly show any buds, the plants of the new strain bore from 3 to 5 of their giant flowers.

DWARF ORNAMENTAL POMEGRANATE
ORNAMENTAL POMEGRANATE

A New Christmas Plant

This is our last fall's introduction. We were not familiar with the culture of this plant and suggested sowing the seed in January. We found since that the seed germinates very slowly and irregularly, and that real good plants are not obtainable if sown so late, so we suggest to our customers to make a sowing in July or August and we feel that better results will be obtained.

The seedlings should not be pricked off into 2-inch pots until they show character leaves.

Next spring as soon as the weather warms up sufficiently, they could be shifted to cold frames in the full rays of the sun and brought back into a forcing temperature about the last week in August and "forced" in a temperature of 60 to 65 degrees for the Christmas trade. They come into flower early, but the first flowers should be kept "nipped" until well on in September when they will begin to take on a general crop which will make them salable in December and for several months following. 200 seeds, \$1.00; 1,000 seeds, \$4.50

The Economical Seeder

A handy little tool which will be found useful and economical in sowing all fine seeds. It is made of zinc and measures $4\frac{3}{4}$ inches over all.

The instrument is small enough to be held in the palm of the hand and the amount of seed is controlled by a simple action of the thumb operating a slide regulating the flow of the seed. It has a capacity of one ounce of aster seed and more or less of other seed according to size. It is especially recommended for sowing finer flower seeds such as begonia, calceolaria, cineraria, by florists, and all the smaller vegetable and flower seeds in the garden.

MORSE'S SUPERIOR PINK

A GRAND NEW PINK SWEET PEA

Morse's Superior Pink

This is a new shade of pink in Early Flowering Spencer Sweet Peas and a new and beautiful form of flower. The blossoms are unusually well formed, bold yet frilled in standard and wings to a most unusual degree, giving the flower great daintiness.

The color is a beautiful clear rose pink, very slightly shaded with salmon. This salmon shading gives more life to the color in the daytime and under artificial light is most outstanding.

The variety is a strong grower but not coarse in vine. Flowers grown in New York state last winter measured 2½ inches across the standard without being flattened out and stems averaged 18½ inches in length.

When well grown four magnificent blossoms to each stem is the rule.

This outstanding novelty was awarded a Silver Medal at the International Flower Show, March 16, 1926.

Price (new crop when ready in August), Trade Pkt., (¼ oz.) 50c; oz., \$1.80; ¼ lb., \$6.50; lb., \$24.00.

Sweet Lavender. A pure lavender self, of enormous size, beautifully frilled, always bearing fours and with good stems..... 1.60

Vulcan. The color is the most vivid scarlet ever seen in Sweet Peas; never burns in the hottest sunshine, and in fact, the brighter and hotter the sun, the brighter and more intense is the color. Stems are long, and the three or four blooms are always gracefully spaced..... 1.00

Ball's Rose. A cross of the late-flowering Hawlmark Pink with the Early Flowering Rose Queen. To those familiar with the late-flowering Hawlmark Pink, we can easily convey the color of the Ball Rose, which is a most attractive bright dark rose with just enough of an amber flush to heighten the bright rose effect. The flowers are large and borne on extra long stems. "The color of Ball Rose is so bright that all other rose colored varieties appear dull and faded when compared with it." Awarded the highest recognition by the Commercial Flower Growers of Chicago, the Chicago Florists' Club and the Illinois State Florists' Association. New crop ready end of August..... 1.50 20.00

SEEDS OF BIENNIALS AND HARDY PERENNIALS

Many of the biennials and perennials are now as important to florists as Asters, Sweet Peas, Verbenas, etc., are among the annuals. Some can be forced, such as Delphinium, Canterbury Bells, etc., while many others sell as readily as Geraniums if grown

in pots, not to speak of the cut-flower sorts, such as Coreopsis, Gypsophila, Chrysanthemum, Shasta Daisy, Physostegia, etc. They are really needed in every florist's establishment that caters to the better-class of trade. The demand for them is increasing.

GRASSES, Ornamental

Arundo Donax . From the Greek meaning a reed. Tall leafy perennial grasses resembling bamboos, 8 to 30 feet tall, Giant Reed, rapid grower, clothed with broad, pointed leaves at regular intervals. Grown for lawn decoration. The tall showy plumes are reddish at first and last for a long time. Trade pkt., 15c; oz., 60c.			
Arundo Donax fol. variegata . Much dwarfed and less hardy than above, usually 4 to 7 or even 12 feet, with elegant leaves striped from base to tip with creamy white and green. Trade pkt., 15c; oz. 70c.			
Erianthus Ravennae , Plume Grass. Tall stout reed-like perennial, best hardy substitute for the Pampas Grass. The foliage forms graceful clumps, from which rise long and handsome plumes. Grows easily from seed and will flower first year if sown early. The plumes are fine for winter use when dried. Trade pkt., 15c; oz., 80c.			
Eulalia Japonica Zebrina . Perennial grass, used for ornamental purposes in the garden. Rapid growing and if left undisturbed will form clumps 18 feet in circumference. The leaves are banded with white. Trade pkt., 15c; oz., 80c.			
Eulalia Japonica . The correct name is <i>Miscanthus Sinensis</i> . Absolutely hardy. A strong growing ornamental grass. Good for specimen planting. Trade pkt., 15c; oz., 80c.			
Gymnothrix Latifolia . An ornamental perennial grass also known under name of <i>Pennisetum latifolium</i> . 3 to 4 feet, bearing several nodding plumes 1 to 2 feet long. Trade pkt., 15c; oz., 60c.			
Gynerium Argenteum . Pampas Grass. The finest of all plummy grasses and the most important commercially. The plumes are silvery white. Lives with protection as far north as Rochester, N. Y. Perfect specimens can be obtained only in light, rich soil with moderate moisture, especially in early growth. Trade pkt., 15c; oz., 50c.			
Stipa Pennata . Feather Grass. A well-known variety which has been grown in gardens.			
Uniola Latifolia , Spike Grass. One of the best of our hardy native grasses. A grass used with pleasing effect in hardy borders. Leaves are broad and flat, often one inch wide, spikelets large and thin and when full grown droop on slender stems. Trade pkt., 15c; oz., 60c.

All the 60,000 square feet of floor space in this 7-story and basement building, at the southwest corner of West Jackson boulevard and Jefferson street, Chicago, is occupied by Vaughan's Seed Store

Vaughan's New Home Office

Where You and Yours are Always Welcome

ON MAY 1, 1926, fifty years after the foundation of Vaughan's Seed Store, the headquarters departments of the business occupied the 7-story and basement building at 601-609 West Jackson Boulevard, Chicago, which is illustrated above. The building is 75x100

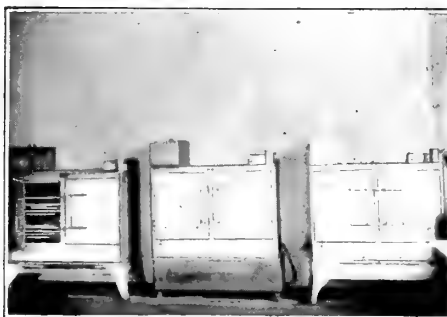

feet, containing 60,000 feet of floor space.

This was the last and the largest of several recent moving operations necessitated by the need for larger quarters in the business of this firm. The Chicago loop retail store occupied a new 4-story building at 10-12 West Ran-

dolph Street in 1924; the New York branch took possession of a 5-story building at 47-49 Barclay Street, in 1925; and the headquarters departments have now made what it is hoped will be the last move for some time; since a 25-year lease has been taken on the building.

The arrangement of order filling, packing and shipping rooms has been studied and equipment planned, with a view to reducing to the shortest possible period the time between the receipt of an order, and the shipment of the goods for which it calls.

The location of the new building was chosen to further this purpose, and reference to the map on this page will prove that it would be difficult to better. Besides being on a conspicuous boulevard corner, easily accessible to motorists, and reached by surface, elevated and suburban lines, the new building is within a few minutes' wagon haul of all the shipping centers of downtown Chicago, which is to say that it is in closest touch with the greatest combination of transportation facilities to be found in the world. The postoffice from which all parcel post shipments are handled is two blocks away. In fifteen minutes after leaving the new building a Vaughan wagon can place an express parcel on board a train bound for any section of the United States.

The illustrations which are shown herewith illustrate the diverse nature of the activities which are assembled in the new building, to give prompt and efficient service to the customers of Vaughan's Seed Store. In this building merchandising alone is carried on. From the farms where they are produced, the warehouses where they are cleaned and stored, the docks on which they are landed by ships from overseas, and the factories where some of them are manufactured, such articles as are

Bring this when you come to see us. It shows the location of our new building with reference to the Union and Northwestern depots, the Metropolitan L (Canal Street Station), and surface car lines on Van Buren, Adams, Monroe, Madison, and Clinton Streets. handled in less than carload lots are gathered here to be packed and shipped to our customers.

On the first floor, occupying the corner, is a retail store. On the same floor is a fully equipped print shop, with four presses, for turning out the miscellaneous printing required in large quantities by a seed house.

The second floor is devoted to the general offices, and the flower seed department, which is under the direct supervision of Carl Cropp, vice-president, who has had charge of this department from its beginning.

The third floor is devoted to the vegetable seed mail order department, and the parcel post shipping room. On the fourth floor is the seed testing laboratory, where all seeds received are analyzed for purity and tested for germination before acceptance. On this floor also are the lawn seed carton filling room, the raffia department, and storage for cleaned grass and field seeds.

The fifth floor is wholly occupied by vegetable and field seed in bags and the sixth floor is given over to the bulb departments, for assembling and shipping bulb orders, chiefly from florists. On the seventh floor is the commission box seed department.

Visitors are always welcomed to any of the establishments of Vaughan's Seed Store, and whatever knowledge we possess of the way to success in business is at the service of our customers and friends. When in Chicago, or New York, please do not fail to call upon us.

Field of Vaughan's Purity Freesias

Vaughan's Freesias California Grown

We asked **twelve** experts what the **florist** should **grow** in place of **Paper White Narcissi**. They had but one answer on which all agreed.

It Was: FREESIAS

Thousands of **Florists** are going to accept this solution of the problem which the **Narcissus Embargo** has presented.

You **know** they will force. You **know** their flowers are more beautiful than narcissi. You **know** that without the competition of cheap Paper Whites they will bring better prices.

Be careful, however, not to compare our prices with those who might be offering "**Discolored**" bulbs, they are worthless.

In addition to the **Purity Freesias**, we offer **named colored sorts**, hybridized by the **eminent grower, Mr. A. Frey**, of California.

BULBS for Mid-Summer and EARLY FALL

True Lilium Harrisii

Our special strain of **Lilium Harrisii** is grown specially for us on the Bermuda Islands by one of the most reliable growers, and under the supervision of the British Government Horticultural Inspectors. Our **Edward Boylan**, manager of our New York branch, spent two weeks last season in examining the various fields on the Islands and found that our **Re-selected** strain is really the best that is now being produced. Each year hundreds of thousands of flowers are taken off of the plants after they have fully opened in order to admit light and air to the lower section of the plants, thereby preventing blight and materially aiding the development of the bulbs. Our **Mr. Boylan** found numerous fields of other growers in the same and nearby section which contained a very high percentage of lilies that **were not true type**. These are known to the growers as **Hybrids**, and are really a cross between the Longiflorum and the Harrisii. They grow much shorter, have a broad foliage, bloom about two weeks later, and carry less flowers per bulb than the **true Harrisii**. This makes them undesirable for early forcing.

Do not allow the matter of **price to interfere** when **buying** this stock. Remember **Hybrid stock** can be bought **cheap**.

White Calla *Ready in September* (Aethiopica)

These can be grown at less expense during the winter months, requiring less heat than other lilies.

Callas being natives of swampy regions grow to best advantage where there is an abundance of moisture, and are therefore very difficult to handle in the curing. Some growers practice **premature cutting off the tops**, expose bulbs to the sun, in order to make **early shipment**. This is very dangerous and will cause dry rot.

We therefore take great pains in **securing our stock from growers** in California who do not use this practice. Our stock is **thoroughly cured in the ground and dried** thoroughly before they are packed. This, of course means **later delivery** but better results can be obtained from such bulbs.

We caution forcers of Callas to water this stock sparingly after planting because Calla bulbs store up considerable moisture.

Let Vaughan's Protect You on Your Fall Bulb Requirements

By placing your orders now (at open prices) it enables us to send to our foreign representatives your order, thus they take advantage of field prices which are invariably lower than at Green Auctions, also helps us to figure more closely our requirements, and with less surplus risk we can make our prices much lower than we can to those who wait until shipping time.

Selling you cases and packing Free F. O. B. New York, Chicago, Seattle and San Francisco. This eliminates all "Special Expenses," "Excess Brokers' Fees" and "Port Charges," in which nearly every U. S. florist-grower has been persistently robbed for years.

In buying Hyacinths from us you buy them by measure in "centimeters." This means much, as against those people who sell "Firsts," "Seconds" or "Thirds" and give you no assurance as to what such grades measure.

Further, you get our fifty years of experience of supplying the most critical Florist and Private Trade with forcing bulbs.

WE have an exceptionally large stock of our own growing. Strictly true to name, all in strong divisions, with from 2 to 5 eyes each. Besides these divided roots, we can supply many of the following varieties in plants, two years (5 eyes and up); and three years (5 to 8 eyes and up) from division. These sizes are more suitable for private customers.

The figures preceding the varieties are the rating given to them by the American Peony Society.

SPHAGNUM MOSS

Bright, Clean, New Growth, free from Brush or Grass

THE BEST GRADE OF SPHAGNUM

is being worked out in Wisconsin districts. Choice dependable quality is worth more money than last year. We quote L. C. L. lots as follows:

MASTICA, For Glazing Greenhouses

The use of "Mastica" avoids the necessity of repeatedly reglazing the houses, saving much time and expense. Broken glass can be easily removed and replaced by new without the breakage of other glass, which usually occurs with hard putty. One gallon will cover about 290 running feet (one side).

Price, per gal., \$2.50; 5 gals., \$12.25; 10 gals., \$23.50.

VAUGHAN'S GREENHOUSE BULBING CEMENT. A pure asphalt glazing compound for greenhouse use. Will not crack or run, and adheres to all glass and framework or sash. One gallon to 300 lineal feet. Apply with Mastica Machine or Bulber. BBL., 50 to 60 gals., per gal., \$1.00; 1/2 bbl., 30 to 40 gals., per gal., \$1.05; keg, 20 gals., per gal., \$1.10; pail, 10 gals., per gal., \$1.20; pail, 5 gals., per gal., \$1.30; can, 1 gal., \$1.50.

PUTTY BULB, Scollay's. A useful tool similar to the well-known Scollay Sprinkler, with a tube instead of spray for applying liquid putty in glazing greenhouses. Each, \$1.25; 3 for \$3.60; doz. \$11.00; in three doz. lots, doz., \$10.50; in six doz. lots, doz., \$10.00. If by mail, (weight under 1 lb).

GLAZING POINTS, Vaughan's Perfection—No rights or lefts

No. 2. For large single thick glass.

No. 2 1/2. Double thick, for greenhouses and skylights.

No. 2. Price, per lb. (abt. 900) 60c; in lots of 5 lbs., 55c per lb.; No. 2 1/2 per lb. (abt. 800) 60c; 5 lbs. at 55c per lb.

Write for prices in larger quantities.

SIEBERT'S IMPROVED

Easy to drive and made so they will not wedge or crack glass in driving. The head gives a good surface and makes it very easy to drive with a chisel, and the point is very easily pulled out when repairing greenhouse roof. Two sizes, 5/8 and 7/8-inch long, put up in 1 pound packages. Over 1,500 points in 1-lb. pkg. of 5/8; over 1,000 points in 1-lb. pkg. of 7/8.

Price: Per lb., 55c; 5 lbs., \$2.50; 20 lbs., \$9.00.
